Profile

Freelance software engineer with a strong focus on backend development, clean architecture, and developer experience. I design and build robust, secure, and scalable applications using technologies such as Node.js, TypeScript, Java, and Python. I am passionate about clean code, automation, and delivering real business value.

Skills

Languages Java, Node.js, TypeScript, Python, SQL
Frameworks Express.js, FastAPI, React, Spring Boot, SAP CAP
Databases PostgreSQL, MongoDB, SQLite
Tools Docker, Git, GitHub Actions, Swagger, Postman
Practices Clean Code, TDD, Agile (Scrum/Kanban), CI/CD

Experience

2025 – **Freelance**, *Backend / Fullstack Developer*, Remote
Present

2025 **Internship in Computer Science**, *Madvision*, Fianarantsoa, Madagascar

- Designed and implemented secure RESTful APIs with role-based access and JWT authentication
- Built modular frontends using React, Tailwind CSS and Refine
- Worked with Bun runtime for ultra-fast server-side performance

2021 – 2025 **SAP Labs France**, *Software Engineering Apprentice*, Caen

- Worked on SAP Convergent Charging backend (Java, OData, SOAP)
- Migrated internal tools to SAP CAP (Cloud Application Programming Model)
- Built technical dashboards using SAP Fiori Elements

Education

2022 – 2025 **Engineer in Computer Science**, *ENSICAEN*, Caen, France

Engineering degree with a focus on software engineering, security, and e-payment

2020 – 2022 **IUT in Computer Science**, *IUT of Caen*, Caen, France

Languages

French Native
English Fluent (C1)

Interests

Travel Adventure motorcycle trips (Madagascar, Vietnam), camping, backpacking
Tech AI, home automation, cybersecurity, tool-building
Creative YouTube content creation (tech + travel), video editing
