

LÉO LÉVÊQUE

Software Engineer – Full Stack

@leoleveque0@gmail.com

+33 6 02 71 48 68

Paris, France

leo-leveque

SUMMARY

Software Engineer graduated from ENSICAEN, specialized in **Backend architecture** and **Full Stack technologies**. Strong experience in demanding environments with **Java/Spring Boot** and **Node.js/TypeScript**, as well as in **cybersecurity** and **e-payment**. Autonomous, rigorous and focused on clean architecture, I am looking for a **permanent or fixed-term position in the Paris region**.

PROFESSIONAL EXPERIENCE

Software Engineer – Apprenticeship

SAP Labs France – Convergent Charging Team

2022 – 2025

Caen, France

- Backend development using **Java/Spring Boot**: design and development of robust REST APIs and microservices.
- Developed a Java agent exposing key application metrics through **Prometheus / Grafana** in a **Kubernetes** environment.
- Developed technological POCs using SAP CAP/CDS and Fiori Elements.
- Automated testing (**Selenium, OPA, JUnit**) and technical documentation.

Full Stack Developer – Final Internship

Madvision

May 2025 – July 2025

Madagascar

- Deployed an ERP for student management into production.
- Designed the **Bun / Express backend** architecture with secure JWT authentication and role-based access control.
- Developed the **React / Refine + Tailwind CSS frontend**, including advanced filters, modals and real-time features.
- Implemented intelligent CSV import/export and contributed to application maintenance.

KEY PROJECTS

ClickAndDrink

Lead Backend Developer

- Real-time ordering platform for entertainment venues.
- Stack**: Node.js, Express, RabbitMQ, Prisma, Swagger.
- Designed an asynchronous architecture capable of handling traffic spikes.

GripID

Project Lead & Backend Developer

- Secure electronic signature solution designed to meet demanding security requirements.
- Stack**: Node.js, Express, Docker.
- Led a 10-person Scrum team and implemented strong authentication mechanisms.

PERSONAL PROJECT / CAREER BREAK

Immersive Backpacking Journey

South America

Feb. 2026 – Aug. 2026

Peru, Colombia, Chile, Ecuador, Argentina

- Independent long-term travel project across South America.
- Developed adaptability, decision-making skills and operational Spanish.
- Created photos and videos to document the journey.

SKILLS

Paradigms & Architecture

OOP Procedural

Clean Architecture

Microservices

Event-Driven

TDD / BDD

Backend & APIs

Java (Spring Boot)

Node.js (Bun/Express)

Python

Go

C, C++

Frontend

React

Vue.js

Tailwind CSS

Data & Infrastructure

PostgreSQL

Docker / K8s

GitLab CI/CD

Prometheus / Grafana

Cybersecurity & E-Payment

PCI DSS

PSD2

TLS / PKI

OAuth2 / OIDC

Strong Authentication

EDUCATION

Master's Degree in Computer Engineering

ENSICAEN

2022 – 2025

Caen, France

Major specialization in **Software Architecture, E-Payment and Cybersecurity**:

- Advanced software design (Microservices, Clean Architecture, TDD).
- Information systems and payment security (PSD2, PCI DSS).
- Cryptography and authentication protocols (TLS/PKI, OAuth2/OIDC).

University Diploma in Computer Science

IUT Caen

2020 – 2022

Caen, France

Technical and foundational computer science education.
